THE IGNAZ SEMMELWEIS INSTITUTE

October Semmelweis Seminar – Doris Wilflingseder

Ortho- and heterotopic effects of immune responses to acute viral infections

Univ.-Prof. Dr.Doris Wiflingseder

Professor of Infectious Diseases at the Ignaz Semmelweis Institute and the University of Veterinary Medicine Vienna

Wednesday, 28 October 26
2 – 3 pm CEST

In person: Jugendstilhörsaal
(Spitalgasse 23, 1090 Vienna)
or online via livestream

Scan to register

What to expect from the talk:

- How airway epithelial cells and immune cells coordinate early defense against respiratory viral infections
- New insights from advanced 3D airway models into inflammation, mucus production, and epithelial barrier damage during viral infections
- How innovative preventive strategies, including inhaled therapeutics and barrir-targeted treatments, may help reduce viral infections and tissue damage
